HYBRID TEA ROSE PLANT NAMED 'WHY NOT CHERISE?'

5 CLASSIFICATION

The present invention relates to a new Rosaceae plant.

VARIETY DENOMINATION

The new plant has the varietal denomination 'WHY NOT
10 CHERISE?'. .

BACKGROUND OF THE INVENTION

The present invention relates to a new and distinct variety
of rose plant of the hybrid tea rose of the genus Rosaceae which
15 was created by crossing as seed and pollen parents two (2)
unknown rose varieties. The varietal denomination of the new
variety is 'WHY NOT CHERISE?'. .

SUMMARY OF THE INVENTION

20 Among the novel characteristics possessed by this new
variety which distinguishes it from other varieties of which I
am aware, is its dark orange-red flowers.

Asexual reproduction by propagation by budding of the new
variety as performed in Wasco, California shows that the
25 foregoing and other distinguishing characteristics come true to
form and are established and transmitted through succeeding
propagations.
